CRATEREFURBO® | FX LUMINAIRE®

THE ANSWER TO YOUR
WELLITE DREAMS

Patent Pending design and superior fire resistant materials address this industry-wide issue of fire risk with several Xclusive features. The integral honey comb grate serves to prevent debris build up and provides superior glare protection. Xclusive Xenon PAR36 lamps are available in both 20 and 35 watts.

Where the typical PAR36 lamp is rated at 300-3000 hours, the Luxor® Xenolux® lamp is rated at 8000 hours! Patent Pending rail system allows for easy lamp access and fine tuning. No sharp Stainless edges to cut your fingers. Xclusive Patent Pending KoolLenz® system provides wider beam spread and color temp modification to enhance green plant tones.

THE BEST HOUSE ON THE BLOCK

Fully encapsulated lamp housing keeps terminals and lamp from being stuck in the mud. This is a very common source of system problems with inferior PAR36 WellLite products. The CF goes both ways – just flip the housing and, as if by magic, the grate fits both sides! The grate is both Lawn Mower and Planter Debris approved for application flexibility.

This lighting fixture is rated for transient landscape moisture – it is not an underwater light.
