

Automated Color-Changing Pool and Spa Lights

By Pentair Water Pool and Spa®

SAm® Spectrum Amerlite®

SAL® Spectrum AquaLight®

Automated Color-Changing Pool and Spa Lights

Create a nighttime wonderland in your backyard

SAm® and SAL® color-changing pool and spa lights produce brilliant underwater color lighting effects that transform your pool or spa into a luminous nighttime wonder. SAm is the first, brightest, and world's number one choice for automated color-changing swimming pool lighting, while SAL is a compact package that creates the same dramatic, spectrum-wide color effects in spas.

Revel in a continuously changing underwater light show. Or, pause and bathe your pool or spa in a single captivating color. Both SAm and SAL produce breathtaking color at the flip of a switch, and allow you to explore the ultimate in nighttime lighting effects:

- Synchronize color changes in your pool and spa by combining SAm and SAL for dramatic color harmony across your backyard.
- Create a truly unique and spectacular swimming colors effect from one end of your pool to the other with the IntelliTouch® automation system and our exclusive Swimming Colors™ program.
- Orchestrate a symphony of swimming color across your pool, spa, and your entire backyard by using IntelliTouch to synchronize multiple SAm lights with SAL and FIBERworks® fiber optic lighting.

It's no wonder SAm and SAL are the world's premier color-changing lighting systems. No other lighting gives you the freedom to create your own unique and magical nighttime pool and spa environment.

Brighter, more breathtaking

SAm and SAL automated color-changing pool and spa lights are still the industry standard for reliable performance and breathtaking lighting impact. Here are just a few of the features that place SAm and SAL above the competition:

Tailor the coverage of your SAm lighting—a simple quarter turn of the lens switches the standard beam to a wide-angle pattern, for maximum light coverage.

SAm's twin 75-watt halogen bulbs provide illumination equivalent to 300 watts of incandescent light—for brilliant color effects.

SAL's 35-watt halogen bulb—equal to a 75-watt incandescent bulb—produces vivid color in your spa.

Pentair's color-changing technology creates natural, subtle transitions between colors.

Both last longer than other underwater halogen bulbs—up to 4,000 hours.

One-Year limited Warranty.
See warranty for details

UL listed for use in swimming pools, spas and water fountains.
